MAPPING TOOLS

Topography - Explorer

Explorer is the geometric abstraction of the organic contour lines within a topographical map. It is a modern take on an ageless cartographic medium that is both familiar and innovative.

Explorer in Plans and Terrain, 25cmx1m, vertical ashlar installation
MAPPING TOOLS

Topography - Relief

Relief acts as both the antithesis and compliment to Explorer. Greater line density starts to create visual planes while emphasizing the geometry and rhythm of Explorer.
MAPPING TOOLS

Topography - Navigator

Based on a 3-dimensional point field map, Navigator used a series of pixel points to create plane and perspective within a single tile. A combination of tiles create a dynamic terrain comprised of tilting and shifting visual planes.
Regions shifts the scale and density of Navigator. What once felt like a textural abstraction of a 3-dimensional plan, now takes on its own unique surface quality.
